BeST
Barangay e-System & Tools

BARANGAY

The Barangay e-System & Tools (BeST) is an Internet based e-Governance solution that provides a systematic approach in managing the residents' profile, judicial information and enables document generation for effective planning and monitoring at the barangay level.

Barangay officials will have real-time hands-on experience with BeST. They will be able to store, retrieve and modify information created by the system using Information and Communication Technology.

BeST improves e-Governance

What does BeST aim to do?

BeST helps empower officials with an Information system that allows them to manage the activities of the barangay

The computerized record system is also beneficial for the residents since it generate reports and documents

And, this sustainable solution will yield possible revenues

BeST Features

• Residents Profile Management System

• Judicial Managament System

• Generation of Residents Barangay Clearance

• Generation of Barangay Business Permits

• Generation of Barangay ID

• Transaction Reports

• Disaster Risk Reduction Management System

• Secure Barangay database access with authorization

• Allows municipal/ city level integration with authorization

• Barangay website with content management system

• Products and Goods Information System

• Utilize cloud-based client-server web technology

What are the opportunities?

• Hardware and software in one package that can easily print reports and documents, in return it produces ROI

• Cost effective, user-friendly and affordable system that is also internet-ready

• Barangay database integration for Municipal administration

• Latest system upgrades provided
